4. LICENSEE NUMBER(S)

13-32181-01

5. DATE(S) OF INSPECTION

Oct. 20, 2005

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection

☒ 1. Based on the inspection findings, no violations were identified.

☐ 2. Previous violation(s) closed.

☐ 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied.

Non-Cited Violation(s) was/were discussed involving the following requirement(s) and Corrective Action(s):

☐ 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.

(Violations and Corrective Actions)

Licensee's Statement of Corrective Actions for Item 4, above.

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

PROGRAM SCOPE

The International Paper Company employed 180 individuals at its Terre Haute plant, operated continuously, and produced "medium" for cardboard products. The licensee possessed one Pm-147 Impact 440 gauging device installed on its paper machine. The gauge was used for thickness measurements of the product. The licensee also possessed two generally licensed gauges containing Cs-137. The licensee retained the services of an authorized consultant who serves as the authorized gauge user. The inspector noted all sealed source leak tests, inventories and shutter tests were performed at the required frequencies.

During this inspection, the NRC inspector toured licensee's plant, performed independent radiation surveys around the gauge and the immediate working areas, reviewed select records, and interviewed select licensee personnel. The inspector also noted that immediate environmental conditions around the device.
