Subject: Re: Fwd: Redraft of VY press release

Brian/Neil -

Looks good - suggest the following revision to the 3rd paragraph

Following the assessment meeting and a short break, the NRC will meet with the public at approximately 8 p.m. to discuss the status of the agency's review of Entergy Nuclear's request for a power uprate at Vermont Yankee. The NRC's review of that request is still in the early stages. NRC staff will start this meeting with a brief presentation describing the agency's review of power uprate applications. Afterwards, the staff will answer questions related to ~~the review.~~ NRC's power uprate review process.

Allen
