Subject: Re: draft Comm Plan for VY spent fuel rod segments

Randy - the com plan hits many good messages. A couple of suggestions:

- a statement regarding our view of this situation - that it was not what we expected for proper MC&A of spent fuel
- a statement on what we require for MC&A
- a point on how long it will take for the review - how long is acceptable for NRC

>>> A. Randolph Blough 4/23/04 12:31:06 PM >>> *RI*

Attached is a rudimentary comm plan; please provide comments to me today.

More detail will be fleshed out when the overall VY comm team meets Monday, but, if we agree that this plan covers the basics, we can share it with internal stakeholders for interim use.

thanks.

randy
