

November 17, 2005

Mr. Ronnie L. Gardner
Manager, Site Operations
and Regulatory Affairs
Framatome ANP
3315 Old Forest Road
Lynchburg, VA 24501

SUBJECT: REVISION TO ACCEPTANCE OF BAW-2241(P), REVISION 2, APPENDIX G,
REVISION 1, "FLUENCE AND UNCERTAINTY METHODOLOGIES," FOR
REVIEW (TAC NO. MC6631)

Dear Mr. Gardner:

By letter dated March 31, 2005, Framatome ANP (FANP) submitted for NRC staff review Topical Report (TR) BAW-2241(P), Revision 2, Appendix G, Revision 1, "Fluence and Uncertainty Methodologies." The NRC staff has performed an acceptance review of "Fluence and Uncertainty Methodologies." In a letter dated June 6, 2005, the NRC staff stated that they expected to issue its safety evaluation by November 30, 2005, and issue the final safety evaluation by December 29, 2005.

By letter dated October 11, 2005, FANP notified the NRC of a delay in responding to the NRC staff's request for additional information. Therefore, the NRC staff now expects to issue its draft safety evaluation by January 31, 2006, and the final safety evaluation by February 28, 2006. The staff estimates that the review will require approximately 120 staff hours including project management time and the estimated contractor cost of 50,000 dollars. The review schedule milestones and estimated review costs were discussed and agreed upon in a telephone conference between Gayle Elliot and Michelle C. Honcharik of my staff on October 18, 2005.

Sincerely,

/RA/
Daniel S. Collins, Acting Chief
Special Projects Branch
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation

Project No. 728
