Subject: Re: Questions Regarding the Ninety (90) Day Required Notice Concerning the Catchment Basin Excavation

Oscar:

LC 9.4 states that the NRC needs at least 90 days notice before resuming operations. Therefore, you can start operations any time after the 90 days. However, I would like to know exactly when you're starting operations when that time comes.

I'll be out of the office the first two weeks of August for training in Oak Ridge, TN. If you give notice during that time period, please call me on my cell phone at 410-206-8717. If you have any other problems or questions, you can also call me on my cell phone.

Steve

Stephen Cohen:

If Kennecott Uranium Company were to provide the Nuclear Regulatory Commission (NRC) with the required three (3) month notification of the intent to commence work, would that notification bind the company to commencing excavation operations three (3) months after notification is given or could Kennecott Uranium Company then commence work anytime after three (3) months after giving notice?
