

November 18, 2005

Mr. Brian Ross
ABC Investigative Unit
143 Columbus Ave.
New York, New York 10023

Dear Mr. Ross:

I'm sure you are off to other things now, but I wanted to let you know we appreciate the opportunity to take a second advance look at some of the material you used in the "Radioactive Roadtrip" piece on research and test reactors that ran in October. In addition, the reactor-by-reactor observations ABC posted to its web site were helpful as well.

I'm writing to formally follow up on a request we made verbally earlier. If you're not the right person to get this request, could you please pass it to the appropriate corporate or news executive.

We would like to see all the video shot by the interns at the RTRs, review any notes they took and interview the interns now in ABC's employ to determine if there are any security issues that warrant further NRC action. While the NRC continues to conclude that security at the RTRs meets all applicable requirements and is adequate, the NRC believes it is appropriate to review the materials ABC developed to ensure nothing of significance escapes our attention.

I look forward to hearing from you.

Sincerely,

/RA/

Eliot B. Brenner, Director
Office of Public Affairs
