Subject: SFP Questions

Here are some questions that I hope you can help get answered.

- 1) What was the time period of the previous SFP leak (mod to repair)?
- 2) Related to the previous leak, what was the corresponding chemistry data (radionuclide inventory)?
- 3) When were the SFP loading bay core bore samples taken and when did you first find indications of soil contamination from the underground floor drain line?
- 4) When was the soil contamination from the floor drain remediated, how much soil removed and radionuclide concentration levels of the soil?

Thanks for the help.

Mark Cox
