ACTION: Notice of Issuance of Amendment to Materials License SNM-2509

EFFECTIVE DATE: [INSERT DATE 30 DAYS FROM PUBLICATION]

SUPPLEMENTAL INFORMATION:

The U.S. Nuclear Regulatory Commission (NRC or the Commission) has issued Amendment 5 to Materials License No. SNM-2509 held by Portland General Electric Company (PGE) to delete from Technical Specification (TS) Section 5.5.2, "Radioactive Effluent Control Program," the sentence from TS 5.5.2.b. that reads, "The Trojan ISFSI may be included in the environmental monitoring program for the Trojan Nuclear Plant," and TS 5.5.2.c. in its entirety, which requires an annual report to be submitted pursuant to 10 CFR 72.44(d)(3). Approval of these changes to the TS in conjunction with an exemption request approved on November 9, 2005, relieves PGE from the requirement to submit an annual radioactive effluent report for the

Trojan Independent Spent Fuel Storage Installation (ISFSI), located in Columbia County, Oregon.

This amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. This amendment satisfied the criteria specified in 10 CFR 51.22(c)(10)(ii) and 10 CFR 51.22(c)(11) for a categorical exclusion from the requirements to perform an environmental assessment or to prepare an environmental impact statement.

In accordance with 10 CFR 72.46(b)(2), a determination has been made that the amendment does not present a genuine issue as to whether public health and safety will be significantly affected. Therefore, the publication of a notice of proposed action and an opportunity for hearing or a notice of hearing is not warranted. Notice is hereby given of the right of interested persons to request a hearing on whether the action should be rescinded or modified.
