

November 16, 2005

LICENSEE: AmerGen Energy Company, LLC

FACILITY: Oyster Creek Nuclear Generating Station

SUBJECT: SUMMARY OF MEETING HELD ON OCTOBER 20, 2005, BETWEEN THE U.S. NUCLEAR REGULATORY COMMISSION (NRC) STAFF AND AMERGEN ENERGY COMPANY, LLC REPRESENTATIVES TO DISCUSS THE RESULTS OF THE SCOPING AND SCREENING METHODOLOGY AUDIT FOR THE OYSTER CREEK NUCLEAR GENERATING STATION LICENSE RENEWAL APPLICATION

On October 20, 2005, the NRC staff met with members of AmerGen Energy Company, LLC (the applicant) in a public meeting to discuss the results of the scoping and screening methodology audit supporting the review of the license renewal application (LRA) for the Oyster Creek Nuclear Generating Station. The application was submitted by letter dated July 22, 2005. The list of attendees is provided in Enclosure 1.

The NRC staff provided an overview of the areas reviewed during the audit, as well as the results of the review. The staff determined the applicant used a sound, well organized scoping and screening methodology, and that the scoping and screening process was implemented consistent with the applicant's procedures. There were four areas in which additional information will be requested: (1) the technical basis for crediting 11 grouted wall penetration as an equivalent anchor for small bore piping; (2) verify that underground piping was not credited as an anchor that is equivalent to a seismic anchor; (3) describe the Quality Assurance program for the combustion turbines; and (4) verify scoping of support systems using plant and industry experience. The staff also answered numerous questions from the public regarding the methods used during the Oyster Creek audit and the license renewal process in general.
