Holtec International Quality Assurance Program

References: 1. Holtec Project 5014
2. NRC Quality Assurance Program Approval for Radioactive Material
Packages Number 0784, Rev. 3

Dear Sir:

We herewith submit Proposed Revision 14 of the Holtec International Quality Assurance Program Manual for your review and approval under the provisions of 10 CFR 71.38.

This revision is necessary due to the change of our manufacturer, UST&D, from a subsidiary to an operating division of Holtec International. Currently, manufacturing is performed under a separate QA program that is essentially identical to Holtec's QA program. Integrating the manufacturing as an operating division of Holtec requires minor editorial changes to Holtec's current QA Manual. These changes, along with several other editorial changes and clarifications are incorporated into the Proposed Revision 14 QA Manual.

Two copies of the Proposed Revision 14 QA Manual are provided to you for your convenience. One copy provides all of the marked up changes. The second copy is an unmarked copy excluding line bars in the left margin which indicate locations of changes.

Once the new QA Manual Revision is approved, we will also update the references to this Manual in our HI-STAR and HI-STORM storage FSARs (USNRC Docket Nos. 72-1008, 72-1014).
