	IMC 0305	11/15/05
	IMC 0306	11/15/05

TRAINING: IMC 0305 - Web-based training completed in August 2005.

REMARKS: IMC 0305 (Operating Reactor Assessment Program) has been revised to: 1) provide clarification on the development and treatment of substantive cross-cutting issues, 2) provide clarification on when to start counting inspection findings in the assessment program, 3) add additional oversight options that can be utilized when a plant is exiting the IMC 0350 process, and to 4) Align guidance for the assessment of security-related findings and PIs in IMC 0305 with IMC 0320, "Operating Reactor Security Assessment Program."

IMC 0306 (Information Technology Support For the Reactor Oversight Process) has been revised to: 1) incorporate recommendations from a recent OIG audit of the Reactor Program System, 2) clarify the uses and definitions of several terms to ensure consistent application, 3) clarify the process for initiating and updating inspection finding information in RPS, and 4) remove several of the detailed attachments and tables to relocate them to the internal ROP Web page for easier revision and maintenance.
