Edwin I. Hatch Nuclear Plant
Supplemental Information to the Fourth 10-Year Interval
Inservice Testing (IST) Program Update Phase In Schedule

Ladies and Gentlemen:

By letters dated April 20, 2005 and June 28, 2005, Southern Nuclear Operating Company (SNC) informed the NRC of its intent to use the guidance in NUREG 1482, Revision 1, Section 3.3.3 and phase in the implementation of the IST Program Update.

In response to SNC and NRC discussions on October 11, 2005, SNC is submitting a detailed phase-in schedule for implementing the Fourth 10-Year Interval IST requirements. The enclosed schedule shows that all procedures that are only performed during refueling outages will be updated prior to the outage of each unit, with the Unit 1 outage beginning February 2006. All other procedures will be phased in during the remainder of the year. If progress of procedure updates fall significantly behind the schedule provided, then SNC will notify the NRC.

This letter contains no NRC commitments. If you have any questions, please advise.

Sincerely,

A handwritten signature in black ink, appearing to read "H. L. Sumner, Jr.", written in a cursive style.

H. L. Sumner, Jr.

HLS/IFL/daj
