Neil,

Let me go through each question in order:

1. Was the INPO report cited on Page 4 ("Significant Operating Experience Report (SOER) 90-01 for 'Ground Faults on AC Electrical Distribution' ") issued in 1990?

2. Does the NRC have any general commentary on the report's conclusions? If not now, when might we?

Exemption

3. This is not in the report, but someone (maybe Ray Shadis) told the reporter that wind speed in the ductwork increased after a new transformer (as part of the uprate modifications) was installed and that, in turn, increased the likelihood of failure of the expansion joint. Is that true?

dave p.
