

<b>NRC FORM 7</b> (5-2003) 10 CFR 110		<b>U.S. NUCLEAR REGULATORY COMMISSION</b>		APPROVED BY OMB: NO. 3150-0027 EXPIRES: 05/31/2006 Estimated burden per response to comply with this mandatory collection request: 2.4 hours. This submittal is reviewed to ensure that the applicable statutory, regulatory, and policy considerations are satisfied. Send comments regarding burden estimate to the Records Management Branch (T-8 E6), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by Internet e-mail to <a href="mailto:infocollects@nrc.gov">infocollects@nrc.gov</a> , and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0027), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

**RE: Application for Specific License for the Export of Americium in amounts  
exceeding SI Limits - NRC 10 CFR, Part 110**

Deputy Director,

Halliburton Energy Services, Inc. is applying for a license to export, re-export, and import Category 2 Americium-241 and Americium-241/Be for shipments [REDACTED]. These materials are used to calibrate down hole well logging equipment, for the completion of an oil or gas well prior to production, or to enhance production of existing wells. These items are subject to the export licensing jurisdiction of the U.S. Nuclear Regulatory Commission. Enclosed please find Halliburton check in the amount of \$1600.00 (Sixteen hundred dollars) as the application fee for this license.

The NRC – Controlled Items are currently in the possession of either Halliburton Energy Services in the United States or subsidiaries in application countries. The NRC Controlled items that are currently abroad were authorized for export from the United States by an NRC General License under the conditions of Title 10, Parts 110.23 of the Code of Federal Regulations. Following the export of these materials, the material will remain in the custody of Halliburton employees and when not mobilized in support of field activities will be stored in a secure Halliburton facility.

Halliburton Energy Services uses by-product material as tool and equipment calibration sources for the purpose of calibrating and testing well logging tools. The NRC Controlled items are described in attachment 2 to the application.

Halliburton Energy Services in consideration of Title 10, Part 110.42.(c) of the Code of Federal

## Halliburton

Regulations submits that the NRC-Controlled Items proposed for export and re-export are not inimical to the common defense and security of the United States and the proposed exports and re-exports are consistent with the policies and objectives of the United States Government.

Included in the application package please find a completed and signed copy of NRC Form 7, "Application for License to Export Nuclear Material and Equipment," with Attachments and 4 copies of the application package to facilitate your review.

If you should have any questions please do not hesitate to call or write at the above number or address.

Sincerely,

Pam Loprete

Attachment 3 – Indonesia Licenses  
Halliburton Check for Application

---

**Attachment 1**

**USNRC Form 7, Application for License to Export, Re-Export, and Import  
Americium Material**

**Application Items 16, 17, 18, 20, 21, and 23**

**Attachment 1**  
**USNRC Form 7, Items 16 – 23**

Halliburton's license application criteria is based on specific shipments that exceed NRC threshold limits as per 10 CFR Part 110. Our current inventory includes [REDACTED] Ambe sources that will require this license for all exports, re-exports, or imports returning to the U.S.

The new regulation requires the use of the 'sum of calculations' methodology for multiple or consolidated shipments. Halliburton has several Ambe sources that are less than the threshold but could exceed the limits if consolidated.

For this reason we are requesting a quantity of 25 'events' or movements between countries. Each shipment will be considered one event and therefore one pull down on the license and one notification to the NRC.

Description	Unit Value (rounded )
[REDACTED] Am241Be Logging Source used with dual spaced Neutron Tool.	\$4,000.00
[REDACTED] Am241Be Logging Source used with dual spaced Neutron Tool	\$500.00
[REDACTED] Am241 source for use with the Fluid Density Tool	\$1500.00
[REDACTED] Am241 calibration source for tool calibration	\$2200.00
[REDACTED] Am241Be sealed source with transport shield used in Compensated Thermal Neutron (CTN) Tool	\$8000.00
[REDACTED] Am241Be sealed source with transport shield used in Compensated Neutron Porosity Tool (CNPh)	\$5500.00
[REDACTED] Am241Be sealed source installed in Compensated Thermal Neutron (CTN) verifier for calibration of CTN Tool.	\$600.00

As noted in the support documents these 'events' would occur between Halliburton Energy Services and Subsidiaries in the following countries: Indonesia. See Attachments 4 for a copy of Halliburton's license to import and use Ambe in Indonesia.
