February

Brad,

The PG&E Humboldt Bay Power Plant response to the NRC August 18, 2004 Security Order contained typographical errors for the completion dates for items B.9 and B.10. The correct completion dates for both items B.9 and B.10 should be February 14, 2005. We apologize for any inconvenience this caused. PG&E will submit a non-safeguards letter shortly stating the correct completion dates.

David Sokolsky
Supervisor of Licensing
Humboldt Bay Power Plant

Dave and Zane

Can you respond to this?

Roy

Subject: Humboldt Bay 20-Day Response

Good afternoon,

The Division of Nuclear Security (DNS) in the Office of Nuclear Security and Incident Response has reviewed your 20-day response in relation to the August 18, 2004, Access Authorization Order for Independent Spent Fuel Storage Installations. The staff is requesting additional clarification on the following items before closing out the review. The items are minor in nature but are required for closure. If you would like to discuss further or you have additional questions please contact Mr. Brad Baxter at (301)415-6742.

Clarification Needed:

1. As stated in your response, you'll be in full compliance with B.9 as of 2/14/04. Is this correct?
2. As stated in your response, you'll be in full compliance with B.10 as of 2/4/04. Is this correct?

B123

Again, these items are minor in nature but necessary for closure.

Respectively,

Brad Baxter
