Subject: Application For Amendment To USNRC License Number SMB-1527,
Docket 040-08976

The Westinghouse Electric Corporation hereby submits this application for an amendment to License Number SMB-1527 which reduces the authorized possession limits for this license. Over the past two years, Westinghouse has undertaken the decontamination of the equipment, facilities and land at the Bloomfield, NJ site in order to terminate the license and release the site for unrestricted use. Only Building Number 9 on the site requires further decontamination effort. The only remaining licensed material on the site consists of the remaining residual contamination. All other licensed material has been packaged and shipped off the site for proper disposal.

Westinghouse therefore requests that the license conditions (6A, 7A and 8A) that authorizes the possession of 500 kg of Thorium be deleted from the license.

Enclosed is a check in the amount of \$450.00 in payment of the fee specified in 10CFR170.31 for this application.

If you have any questions concerning this application, please contact me by telephone on (412) 374-4652.

Sincerely,

A. J. Nardi
