<div style="display: flex; justify-content: space-between;"> <div style="width: 30%;">Summary:</div> <div> <p>Region I (RI) contacted ABB Prospects, Inc. (ABB) to discuss the purpose of requesting a license renewal rather than a license termination.</p> <p>ABB stated that it requested a license renewal because they may need the SNM license for possession, packaging, storage, handling and transportation of residual contamination in anticipation of removal of all licensed material and eventual termination of the license. ABB is waiting for the US Army Corps of Engineers (USACE) to issue a Record of Decision by December 2006 and begin remediation activities in areas impacted by early operations of the Naval nuclear program. USACE will oversee cleanup of these areas under the Formerly Utilized Sites Remedial Action Program (FUSRAP).</p> <p>Based on the above summary, RI proposed a change to the License Tracking System (LTS) Program Code from 21210 to 23300. (Descriptions of the LTS Program Codes are found in NUREG 1556, Vol. 20, Appendix G.) ABB requested three weeks to compare the program to the proposed program code. RI agreed. ABB will contact the inspector upon completion of the review.</p> </div> </div>		
<div style="display: flex; justify-content: space-between;"> <div style="width: 30%;">Action Required:</div> <div>           Change program code from 21210 to 23300.            Complete licensee renewal.         </div> </div>
