Subject: Question

Steve,

We have another question concerning the Cornell Decommissioning Plan Appendix B, Environmental Report. The Environmental Report in Section 3.2.3.2 says that surface (water) run-off from Ward Center currently flows primarily south, across paved and unpaved surfaces to the Cascadilla Creek Gorge. In section 3.2.4.4, the report says a protected endangered salamander lives in the gorge adjacent to the site according to the New York Department of Environmental Conservation database. Please discuss the mitigative strategies that you plan to implement, during the decommissioning process, to prevent any deleterious impact on the habitat of the endangered salamander.

You can send the response by email but I would suggest that as you did the last time repeat the questions (referring to the time and date of the email I sent) and provide the answers in a letter, and attach the replacement pages. All under an Oath or Affirmation. Thanks
Dan
