NUCLEAR REGULATORY COMMISSION
REGION IV
611 RYAN PLAZA DRIVE, SUITE 400
ARLINGTON, TEXAS 76011-4005

December 9, 2005

TO: ALL AGREEMENT STATE LICENSEES IN ARIZONA, ARKANSAS, CALIFORNIA, COLORADO, KANSAS, LOUISIANA, NEBRASKA, NEVADA, NEW MEXICO, NORTH DAKOTA, OKLAHOMA, OREGON, TEXAS, UTAH, AND WASHINGTON WHO FILED AN NRC FORM 241 IN CALENDAR YEAR 2005

SUBJECT: **FILING NRC FORM 241 FOR CALENDAR YEAR 2006**

Agreement State licensees seeking to conduct activities under reciprocity in areas of exclusive Federal jurisdiction, non-Agreement States, or in offshore waters, for the first time in a calendar year (January - December) must submit the following:

1. NRC Form 241, "Report of Proposed Activities in Non-Agreement States, Areas of Exclusive Federal Jurisdiction, or Offshore Waters," attached, or accessible from the NRC web site at: <http://www.nrc.gov/reading-rm/doc-collections/forms/nrc241.pdf>, and
2. Four (4) copies of the Agreement State Radioactive Materials Specific License, and
3. Fee specified in Category 16, 10 CFR 170.31 (**currently \$1800**) by either check or credit card. If using credit card, please use NRC Form 629, attached, or accessible from the NRC web site at: <http://www.nrc.gov/reading-rm/doc-collections/forms/nrc629.pdf>.

This filing must be made to the NRC at least 3 days prior to conducting activities for the first time in a calendar year (January - December) under the General License established by 10 CFR 150.20. Licensees cannot perform work in areas of exclusive Federal jurisdiction without either: 1) filing NRC Form 241 for reciprocity in accordance with 10 CFR 150.20, or 2) applying for a specific NRC license. The required documentation may be faxed to **(817) 860-8263** or **(817) 860-8188** and the originals mailed to the address on the letterhead.

This general license authorizes persons holding a specific license from an Agreement State to conduct the same activity in areas of exclusive Federal jurisdiction, non-Agreement States, or in offshore waters, if the specific license issued by the Agreement State authorizes temporary jobsites for the respective activity. Under the general license, licensees conducting reciprocity activities, including storage (usage), are limited to a total of 180 days in a calendar year. Reciprocity activities conducted in offshore waters are not subject to the 180-day limit. NRC tracks reciprocity usage on the basis of approved usage days and will not approve any activity, under the general license, that causes the total usage days to exceed 180 days, except for offshore waters. It is important that licensees track the days of use and clarify or delete dates of work when applicable.

Please note, for those licensees who received orders or license amendments from their Agreement State for increased controls with respect to the possession of radioactive material quantities of concern, you must implement those same controls while working at temporary jobsites in exclusive Federal jurisdiction.

Please refer to NUREG-1556, Volume 19, "Guidance For Agreement State Licensees About NRC Form 241 and Guidance for NRC Licensees Proposing to Work in Agreement State Jurisdiction (Reciprocity)" for information regarding how to file an NRC Form 241 and complying with NRC regulations under reciprocity. It is expected that licensees will review this information, as well as the regulations in 10 CFR 150.20, to ensure that their radiation safety program is in compliance with NRC regulations prior to conducting activities in exclusive Federal jurisdiction. NUREG-1556, Volume 19, is accessible at <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v19/>.

NUREG-1556, Volume 19, Section 8, "Proprietary Information" references the regulation 10 CFR 2.790, regarding requests for withholding information from disclosure. This regulation has been changed to **10 CFR 2.390**. Additionally, on October 25, 2004, the NRC suspended public access to NRC's electronic document system (ADAMS.) The NRC initiated an additional security review of publicly available documents to ensure that potentially sensitive information was removed from the ADAMS database, which is accessible through the NRC's web site. As a result of NRC's security review guidance, it has been determined that all specific documentation regarding reciprocity activities will be withheld from public disclosure through ADAMS.

Agreement State licensees operating under reciprocity in areas of exclusive Federal jurisdiction must conduct activities involving radioactive materials in accordance with the conditions specified in the licensee's Agreement State license, representations made in NRC Form 241, and other rules, regulations, and orders of the NRC, now or hereafter in effect. NRC may perform inspections of activities by Agreement State licensees operating under a general license pursuant to 10 CFR 150.20. Inspections may occur at the listed work site location(s) or at the home office address. Failure to comply with, or conduct your radiation safety program in accordance with, NRC regulations may result in NRC enforcement action(s) against the licensee.

Enforcement actions against the licensee could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking the General License as specified in the NRC Enforcement Policy. This document is available on the following internet address: <http://www.nrc.gov/what-we-do/regulatory/enforcement/enforce-pol.html>

For your information and use in filing for reciprocity, you may obtain NRC Forms, including NRC Form 3, at the following NRC web site: <http://www.nrc.gov/reading-rm/doc-collections/forms/>. NRC Form 3 is a notice which is required to be posted for workers as required by 10 CFR 19.11.

If you do not have access to the internet, or if you have any questions regarding the regulations or the application process, please contact me at 817-276-6552 or Judith Walker at 817-860-8299.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Rachel S. Browder, Health Physicist

I do not have any comments. Be sure and check with Mark Shaffer. Mr. Wert's instructions to me were that we need to coordinate with NMIB before we send out the 241-letter. I would also suggest that we put Mr. Shaffer on concurrence. Mr. Wert indicated that he did not want to see the letter again after Mark concurred or made recommendations to the letter from the inspection perspective. We should go forward and get the letter out to our general licensees.

Thanks for taking ownership and getting the 241 letters out in a timely manner.

Thx//JackW
