SUBJECT: LASALLE COUNTY STATION, UNITS 1 AND 2  
NOTIFICATION OF AN NRC SUPPLEMENTAL INSPECTION  
05000373/2006002; 05000374/2006002(DRS)

Dear Ms. Landahl:

The purpose of this letter is to notify you that the U.S. Nuclear Regulatory Commission (NRC), Region III staff will conduct a supplemental inspection at the LaSalle County Station during the period of January 3 - 6, 2006. The inspection will be conducted by a reactor engineer from the NRC Region III Office.

The inspection will be conducted in accordance with Inspection Procedure (IP) 95001, the NRC's supplemental inspection procedure for one or two white findings in a strategic performance area. This supplemental inspection will involve an inspection of the adequacy of corrective actions relating to the White inspection finding involving the Single Point Vulnerability (SPV) issue of the common 4.16 kV relay and metering circuit.

We request that during the onsite inspection week you ensure that all applicable information regarding this finding including the root cause evaluation, modification, pertinent drawings, and 10 CFR 50.59 evaluation will be readily accessible.

On December 5, 2005, the NRC staff was informed that sufficient implementation of corrective actions existed to support the NRC's supplemental inspection. The scheduling of this inspection was discussed with Mr. Daniel Enright. Your cooperation and support during this inspection will be appreciated. If you have questions concerning this inspection, please contact the inspector conducting this inspection, Mr. Mohammad Munir, at (630) 829-9797 or myself at (630) 829-9731.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

Sincerely,
