Dear Mr. McKinley:

It was a pleasure talking to you on 12/8/05. This letter is to clarify the questions that you had concerning the nuclear medicine daily area survey sheet from College Heights Imaging which is part of my close out documents. Our last patient study was done on July 13, 2005. The check out survey was done on 9/18/05. During this interval I was in the process of attending to the matters of closing the office and nuclear area were under my secure control. It took me that long for the technologist to come in and find out what her duties would be. No contamination was found.

I hope this answers your questions and could allow the official closure of the license of College Heights Imaging Nuclear Section.

I hope to hear from you soon.

Sincerely,

Kenneth Levin, M.D.
