Subject: FOIA Request

I request copies of all studies done by the NRC on the Fansteel's FMRI facility near Muskagee, Oklahoma. I am especially interested in chemical analyses and /or RCRA analyses of the radioactive waste material on site. The radioactive waste material is scheduled to be dumped near my home in Southeastern Utah

I request a wavier of all fees for the following reasons:

1. The studies will be used by the Glen Canyon Group of the Sierra Club's Nuclear Committee to inform the citizens in Southeastern Utah about the hazardous wastes that are proposed to be transported through their communities.
2. Neither the Sierra Club nor I have any commercial interests in distributing the studies...
3. The studies will be distributed to the public by E mail, letters to our local papers, and at a public hearing to be scheduled by Utah's Department of Radiation Control.
4. The studies will be used to advise the local Emergency Response Teams of any dangerous substances in the waste.

The material can be sent by E mail or in hard copy. I would appreciate a phone call about the quantity of material available.

Sincerely:

William E. Love *William E. Love*
