SUBJECT: ACKNOWLEDGMENT OF LICENSE AMENDMENT REQUEST RELATED TO  
TECHNICAL SPECIFICATION SECTION 3.1.2, "SPENT FUEL POOL LOAD  
RESTRICTIONS AND SECTION 5.2.2, "FACILITY STAFF," FOR HUMBOLDT  
BAY POWER PLANT UNIT 3

Dear Mr. Keenan:

The U.S. Nuclear Regulatory Commission staff has received your application dated January 19, 2006, requesting revision of Technical Specification (TS) 3.1.2 to correct an editorial error, and TS 5.2.2 to allow leaving the Unit 3 control room temporarily unmanned during emergency conditions requiring personnel to evacuate occupied buildings for their safety.

We have completed the initial processing, which is an administrative review, and have accepted your application for a more detailed technical review. The more detailed technical review may identify omissions in the submitted information or technical issues that require additional information (RAI). If necessary, these will be forwarded to you under separate cover in the future. The staff expects to complete its review by July 19, 2006, if no RAI is required.

If you have any questions on these matters, please contact me at (301) 415-3017.

Sincerely,
