

APPLICATION FOR LICENSE TO EXPORT NUCLEAR MATERIAL AND EQUIPMENT

(See Instructions on Reverse)

Estimated burden per response to comply with this mandatory collection request: 2.4 hours. This submittal is reviewed to ensure that the applicable statutory, regulatory, and policy considerations are satisfied. Send comments regarding burden estimate to the Records Management Branch (T-6 E6), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by internet e-mail to infocollects@nrc.gov, and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0027), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

RE: Application for Specific License for the Export of Americium in amounts exceeding SI Limits - NRC 10 CFR, Part 110

Deputy Director,

Halliburton Energy Services, Inc. is applying for a license to export, and import Category 2 Americium-241 and Americium-241/Be for shipments that are in excess of the 0.6 terabequerels threshold. These materials are used to calibrate down hole well logging equipment, for the completion of an oil or gas well prior to production, or to enhance production of existing wells. These items are subject to the export licensing jurisdiction of the U.S. Nuclear Regulatory Commission. Enclosed please find Halliburton check in the amount of \$1600.00 (Sixteen hundred dollars) as the application fee for this license.

The NRC – Controlled Items are currently in the possession of either Halliburton Energy Services in the United States or subsidiaries in application countries. The NRC Controlled items that are currently abroad were authorized for export from the United States by an NRC General License under the conditions of Title 10, Parts 110.23 of the Code of Federal Regulations. Following the export of these materials, the material will remain in the custody of Halliburton employees and when not mobilized in support of field activities will be stored in a secure Halliburton facility.

Halliburton Energy Services uses by-product material as tool and equipment calibration sources for the purpose of calibrating and testing well logging tools. The NRC Controlled items are described in attachment 2 to the application.

Halliburton Energy Services in consideration of Title 10, Part 110.42.(c) of the Code of Federal Regulations submits that the NRC-Controlled Items proposed for export are not inimical to the common defense and security of the United States and the proposed exports are consistent with the policies and objectives of the United States Government.

Halliburton

Included in the application package please find a completed and signed copy of NRC Form 7, "Application for License to Export Nuclear Material and Equipment," with Attachments and 4 copies of the application package to facilitate your review.

If you should have any questions please do not hesitate to call or write at the above number or address.

Sincerely,

A handwritten signature in cursive script that reads "Cindy Dorris".
