**In the Matter of Louisiana Energy Services, L.P. (National Enrichment Facility)
Docket No. 70-3103**

Dear Lindsay:

Thank you for providing the computer output files that purport to support the modeling reported upon in the November 24, 2004 expert report of Dr. Arjun Makhijani. In reviewing the information that you provided, however, it appears that substantial information appears to be missing for each of the 14 RESRAD runs. To ensure that we did not misplace the missing pages, we have confirmed with the Attorney General of New Mexico that the copy that they received is also missing the same information.

Specifically, for each of the 14 RESRAD runs performed by Dr. Makhijani, you have only provided pages 1 and 10 of those runs. It is apparent from the Table of Contents, however, as well as from the page references at the top of the documents that you provided, that pages 2 through 9 and pages 11 through 20 are missing from the documentation. As certain of these missing pages appear to be crucial to understanding the input assumptions used by Dr. Makhijani in his RESRAD runs, I would ask that you promptly provide the missing information. If the information has been destroyed, I would ask that it be recreated in accordance with the original assumptions for each of the 14 RESRAD runs.

Yours sincerely,

James R. Curtiss
