Att: Mr. Steve Courtemanche

Mr. Courtemanche,

Per our conversation on 1-26-06, our company, Welltech Eastern, Inc., dba Key Energy Services, Inc. NRC license # 47-21232-01, wish to renew and reactivate our nuclear materials license. Our license has been in "possession only" status for the last 2 years awaiting disposal of our materials. We have succeeded with the disposal of all of our outdated well logging sources to the Los Alamos site. All proper documentation is maintained at our division office. Due to the growth of the oil and gas industry we are looking at the feasibility of adding well logging back as another line of business we can offer our customers across the country.

Therefore, we will need to apply for application and fee schedule to reactivate our license. If possible, could you please forward the materials we will need to do so to the above address? We will also need to know what to classify the license as, since we will not possess any materials until a later date and have disposed of all others.

Thank you for your assistance in this matter,

James D. Dean, RSO
