Subject: USEC Section 106 referral to ACHP

Mr. Snyder,

I wanted to provide you with information relative to USEC Inc.'s proposed American Centrifuge Plant (ACP) which Mr. Ron Linton of the NRC had been discussing with you over the past year. Attached is a copy of our referral letter to the ACHP in reference to objections we received by a consulting party, Mr. Geoffrey Sea. The summary of the NRC's Section 106 for the USEC process (as discussed in the attached letter) can be found at: <http://www.nrc.gov/materials/fuel-cycle-fac/summ-section-106.html>

Please let me know if you have any questions or further concerns about the proposed project. We are currently working towards the incorporation of your previous comments as we move towards completion of the final EIS.

Matt
