Point Beach Nuclear Plant, Units 1 and 2  
Dockets 50-266 and 50-301  
License Nos. DPR-24 and DPR-27

License Amendment Request 242, Supplement 1  
Technical Specification 5.5, Programs and Manuals

Reference: (1) Letter from NMC to NRC dated November 12, 2004 (NRC 2004-0107)

In Reference 1, Nuclear Management Company, LLC (NMC), submitted a request for an amendment to the Technical Specifications (TS) for Point Beach Nuclear Plant, Units 1 and 2. The proposed amendment would revise TS 5.5.7, "Inservice Testing Program," and TS 5.5.8, "Steam Generator (SG) Tube Surveillance Program." The revision updates references to the American Society of Mechanical Engineers code and certain associated periodicities for inservice testing activities consistent with the requirements of 10 CFR 50.55a.

NMC is preparing to submit a proposed amendment to revise the TS related to steam generator tube integrity, consistent with TS Task Force (TSTF) Change Traveler TSTF-449, "Steam Generator Tube Integrity". This upcoming submittal will supersede the revision to TS 5.5.8 that was proposed in Reference 1.

Therefore, NMC requests that the revision to TS 5.5.8 proposed in Reference 1 be withdrawn. The remainder of the amendment requested in Reference 1 remains in effect.

NMC has determined that this supplement to the proposed amendment remains bounded by the No Significant Hazards Consideration Determination submitted in Reference 1.

This letter contains no new commitments or revisions to existing commitments.

In accordance with 10 CFR 50.91, a copy of this application, with attachments, is being provided to the designated Wisconsin Official.

A001

I declare under penalty of perjury that the foregoing is true and correct.  
Executed on January 30, 2006.

A handwritten signature in black ink, appearing to read "Dennis L. Koehl", with a stylized flourish at the end.
