Dear Sirs:

I live in Belchertown, MA, within the 50 mile radius of the Vermont Yankee nuclear reactor. An aged reactor that the Entergy corporation wants to Uprate (see page 1774 Federal Register/ VOL. 71, NO. 7 / Wed. January 11, 2006)

This is an old reactor, the design basis safety margins NO LONGER APPLY. I am terrified of what will happen to this old plant. They refuse to do an ISA and plan an EXPERIMENTAL POWER ASCENSION TEST. This puts my life at risk! We should not rely on nuclear energy for our energy needs - We should put our tax subsidies into WIND, solar, geo-thermal, bio-mass, hydrogen power and CONSERVATION. Lets be RATIONAL
