Celgene Corporation
86 Morris Avenue
Summit, NJ 07901

SUBJECT: CELGENE CORPORATION, REQUEST FOR ADDITIONAL INFORMATION
CONCERNING APPLICATION FOR AMENDMENT TO LICENSE, CONTROL NO. 138255

Dear Mr. Conroy:

This is in reference to your letter dated January 17, 2006 requesting to amend Nuclear Regulatory Commission License No. 29-28056-01. In order to continue our review, we need the following additional information:

The guidance for decommissioning a site is located in NUREG-1757, Volume 1, Rev 1, "Decommissioning Process for Material Licensees." The following questions are based on the guidance located in the NUREG.

1. Confirm that all licensed material has been disposed or transferred from the facility located at 7 Powder Horn Drive, Warren, New Jersey.
2. Submit NRC Form 314, "Certificate of Disposition of Materials," or equivalent information as applicable to the release of the Warren, N.J. facility. Written confirmation from the recipient listed on NRC form 314 that the material has been transferred to them should be attached to the form 314. This form can be located at <http://www.nrc.gov/reading-rm/doc-collections/forms/nrc314.pdf>
3. In support of an environmental assessment related to the release of your facility:
 - a) Provide the name of the facility to be released
 - b) Provide the size of the building in square feet.
 - c) Describe the type of building use such as "general office and laboratory"

d) Describe the surrounding area, such as "residential", "industrial", "commercial", "mixed residential/commercial", etc.

e) Describe the general type of activities authorized on the license, such as "laboratory procedures typically performed on bench tops and in hoods.

4. The Celgene H-3 and C-14 wipe samples appear to have a negative bias. All of the smear counts had readings less than background. Please discuss the cause of this bias in the counting.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select Nuclear Materials; Medical, Industrial, and Academic Uses of Nuclear Material; then Toolkit Index Page. Or you may obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-888-293-6498. The GPO is open from 7:00 a.m. to 9:00 p.m. EST, Monday through Friday (except Federal holidays).

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 138255. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5366.

Please note that you may not reply to this letter by return e-mail. Your reply must be in writing by letter or facsimile (610-337-5269). If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.
