RECEIVED

Chief, Rules and Directives Branch
Division of Administrative Services
Office of Administration
U.S. Nuclear Regulatory Commission,
Washington, DC 20555 0001

Dear Chief,

Citing: page 1774 Federal Register / Vol. 71, No. 7 / Wednesday, January 11, 2006.

Because of Vermont Yankee Nuclear Power Plant's age and because an Independent Safety Assessment has not been made, we strongly believe that the Vermont Yankee Nuclear Plant should not be given an uprate in power production and that it should not continue to operate beyond its original closing date. We live within fallout area of the plant.

Respectfully,

Victor and Mary Burdo
