RECEIVED

To Whom It May Concern:

In response to page 1774 Federal  
Register - Vol. 71, No. 7 - Wednesday Jan. 11, 2006  
I wish to say:

I strongly wish an Independent  
Safety Assessment be performed ~~along~~  
along with a view of a real risk and  
consequence assessment ~~to~~ measurement  
in this area of privately owned Vermont  
Yankee Nuclear Plant in Brattleboro, VT.

Also I wish that in this radically  
changed world that the positive aspects  
of wanting to be in and <sup>to</sup> lead a positive  
position in this beautiful country  
take place now. I am 80 years old  
and I feel victimized by the fact  
that we are not being essentially  
wonderful by not choosing the  
many ways of developing, working, &  
economically positive energy position.

It is time we ~~take~~ take control  
of alternative energy in the Northeast.

Yours,  
Anne P. Tobey
