Subject: Deficiency response of 2/1/06
(NOTE: This will be used as the
Documents Title in ADAMS)

Summary:

I requested that Mr. McComas send NRC certain revisions of the above deficiency response, to which he agreed. These revisions are:

1) Send a letter from Teresa Crist concurring with the contents of the 2/1/06 letter, as well as the current response.

2) Send a new version of emergency response procedures with the following changes;

a) Change "medical physicist" to "authorized medical physicist" in Line 1.

b) Eliminate the actual names of authorized medical physicists and authorized users in Lines 1 and 3, and just say "authorized medical physicists" and "authorized users."

c) Cause Line 7 to read "Van McComas, Authorized Medical Physicist/Radiation Safety Officer" as a contact person.

3) Noted to Mr. McComas that at Points A-D on the facility diagram there is a risk of exceeding 100 mR/yr to unrestricted areas should the workload increase beyond current expectations. Suggested possible options as;

a) Lowering the occupancy estimate.

b) Putting dosimeters in the unrestricted areas to track exposures.

c) Re-evaluate the workload estimate of 2.5 hours per week.

Requested that Mr. McComas discuss the options and his conclusions in his response. He agreed.

I requested that Mr. McComas respond to the above items by facsimile during the week of 2/20/06. He agreed.

Action Required:

Await response before issuing action.
