Could you please send me the file and the persons who authorized Mr. Quinlan to serve as the Radiation Safety Officer as a FOI request. He has no degree in Radiation Physics. Nor experience therein.

You begged the question: I said if there is discrimination by the Quinlan and/or the Committee what is the NRC's obligation. Remember Jim Crow laws in the South? Does the Federal government willfully contenance and allow discrimination in the administration of its regulations?

You also state that even if you and the NRC are aware of criminal activity by the Rutgers REHS committee and or its members that is OK with you as it is not within your perview. Jurisdictional issues are very interesting legal issues.

Best,
Prof. Pieczenik
