Subject: Re: Typo in Code of Fed Regs

Oh, good. Page 840 of 10 CFR Parts 1 to 50, first column, last paragraph the title given for ASTM E 185-73, -79, and -82 is wrong, according to a resource I use. I always check referenced titles when reviewing our SEs and one of my sources is the IHS Global website (global.ihs.com), which is a site you can order Industry Standards from. Their web site says the title should be "Standard Practice for **Design of Surveillance Programs** for Light-Water **Moderated** Nuclear Power Reactor Vessels." I checked the 1973, '79, and '82 editions and they all had this title.

>>> Betty Golden 7/14/03 5:12:13 PM >>>
This is the place! What is the typo?

Thanks,
Betty

>>> Deborah Johnson 07/14/03 04:17PM >>>
Hey Betty! I'm not sure if you're the correct person to direct this to, but I found an error on page 840 of Volume 1 of the CFR. If you are, email me and I'll elaborate. If not, do you know who is? Thanks, Deb

Wally/Steve:

Any chance you can help Betty with this question or know who can. It could be that the title of the standard was changed over the years and we never changed it in the regulations.

Your help would be appreciated.

Thanks
Harry

Harry,

What is the correct title for "ASTM E 185-73, -79 and -82"? I believe this is a code? I'm not sure. I received a call from someone who said the title is incorrect in the Rules and Regs. It is referenced under Part 50, Appendix H, Introduction, second paragraph. The Rules and Regs have it as "Standard Practice for Conducting Surveillance Tests for Light-Water Cooled Nuclear Power Reactor Vessels. This has been in the Regs since May 27, 1983 (48 FR 24008). I was told it should be "Standard Practice for Design of Surveillance Programs for Light-Water Moderated Nuclear Power Reactor Vessels." Can you help? Please call me if you have any questions.

Thank you,
Betty

Subject: Confusion over Standards title

I am a licensing assistant at the U.S. Nuclear Regulatory Commission. In our regulations (Title 10 of the *Code of Federal Regulations*) at Appendix H to 10 CFR Part 50, ASTM E 185 is referenced as "Standard Practice for **Conducting** Surveillance **Tests** for Light-Water **Cooled** Nuclear Power Reactor Vessels," where my search results conducted via your website reveals the Standard's title to be a little different: "Standard Practice for **Design of** Surveillance **Programs** for Light-Water **Moderated** Nuclear Power Reactor Vessels." Please reply as to which one is the correct title. Thank you.

I did some further research. The following came from the ASTM.org web site. Their title is the same as the global.ihs.com web site. You can search the ASTM web site, Individual Standards, by typing in E185 and it'll show you the title. I just wanted to bring the discrepancy to your attention.

"Copyright 2003 ASTM International. All rights reserved.

E185-02 Standard Practice for Design of Surveillance Programs for Light-Water Moderated Nuclear Power Reactor Vessels

Developed by Subcommittee: E10.02

Book of Standards Volume: 12.02

1. Scope

1.1 This practice covers procedures for designing a surveillance program for monitoring the radiation-induced changes in the mechanical properties of ferritic materials in the beltline of light-water moderated nuclear power reactor vessels. This practice includes the minimum requirements for the design of a surveillance program, selection of vessel material to be included, and a schedule for evaluation of materials...."

Debbie,

I spoke with Steve Tingen, NRR, on this. He copied the first page of the code and it is correct as shown in the Rules and Regs. Could the website be wrong? *

Thanks,
Betty

Subject: Confusion with ASTM E185 Title

Betty, I spoke to Steve Tingen who told me he went to the library and made a copy of the title page for this standard that displayed the title as the former (see below); however, I have received a reply to my question from Jeff Adkins at ASTM (jadkins@astm.org), which I have copied below, indicating the latter is correct. Following that is my original email to ASTM containing both titles. Jeff replies to Donna, but I think he meant to type Debbie. I'm providing this response to close the loop. If the CFR needs to be revised, please let me know and I'll inform the other LAs to change their copies. Thanks.

Donna,
The latter title is current.
Regards,
Jeff

Subject: Request from J. Lieberman

Lieberman wants us to call D. Meyer to ask him about a change in section 19132 of the regulations. This was a change that was made in 2000 per the instruction of David. I have his handwritten note in the file. Lieberman wants to know if David remembers why he requested the change. I will explain details when you return.

Zonia, #9 on pp. 6+7

I did speak w/ DLT. He's convinced that he is right but cannot remember who he spoke with or why the change was made. It appears as if Title VII may apply to Fed. employees while Title VI applies to recipients of Fed. funds.

Subject: Regulatory Procedures - 10CFR Part 4

Hi,

SBCR has submitted the Regulatory Procedures index that has been requested. However, we notice a couple of changes that were not on the document that Mr. Travers signed in April, 2001. They are as follows:

p. 51344 - August 26, 2003:
2 (ii) states - (as defined in 20 U.S.C. 7801)

signed by W. Travers in April 2001:
2 (ii) states - (as defined in 20 U.S.C. 8801)

→ #5 on p. 5

p. 51345 - August 26, 2003:
4.51(a)(4) remove states - under the program involved

signed by W. Travers in April 2001:
4.51(a)(4) remove states - , under the program involved

→ #7 on p. 6

Please let us know if this document will need to be resubmitted for signature.

Thanks!
