DOCKETED  
USNRC

February 22, 2006 (11:38am)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

I urge you to adopt stricter security measures for protecting nuclear reactors from terrorist threat. The current NRC rulemaking proposal is entirely inadequate to protect the public from any sizable attack, and the threat is real. Committee to Bridge the Gap's petition for rulemaking proposes sensible, realistic solutions to the problem of our nuclear reactors' susceptibility to attack, and takes positive steps toward keeping the public safe. The consequences of a nuclear attack, were the NRC rulemaking adopted, would be horrific. For the sake of the American people, their children, and generations to come, we need to do more to prevent the disaster that would result from an attack on an improperly protected nuclear reactor.
