February 16, 2006

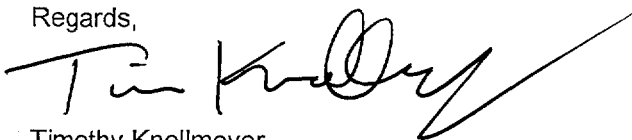

Dear Mr. Miller,

I would like to request that I be instated as the Radiation Safety Officer (RSO) for Severn Trent Laboratories Westfield, MA facility. I have been involved with radioactive sources for 13 years at this facility and I am the RSO on our State License (19-5451). I would like to replace Mr. Peter Law as the RSO for the NRC. I have enclosed my resume and look forward to your response.

Our federal license number is 20-19545-03

tknollmeyer@stl-inc.com

**Joined Severn Trent Laboratories in 1992**

Mr. Knollmeyer currently serves as the East Coast Regional Manager and the National Operations Manager for STL's On-Site Technologies division (OST). OST is responsible for a variety of on-site services including the operation of Mobile Laboratories, staffing and operation of Contract/Op Laboratories and assessment of innovative in-situ analytical techniques. Mr. Knollmeyer supervises sample collection and on-site analytical programs for clients such as Environmental Consultants, Industry and Government agencies.

Mr. Knollmeyer's experience includes an array of organic and inorganic analyses designed specifically for field applications and he has overseen numerous projects undertaken by OST. He has also been trained by the manufacturer on the proper use of the Idaho Technology, R.A.P.I.D Pathogen Detection System which is a PCR-based analytical tool designed to analyze for Anthrax as well as additional biological agents. During the Fall of 2001, Mr. Knollmeyer served as the on site Project Manager when STL was involved with the analyses of bulk and wipe samples for Anthrax. He was instrumental in the building of the on-site laboratory, coordinating all staff involved in preparing these samples and communications with the client.

Typical projects completed under the supervision of Mr. Knollmeyer include;

- On-site anthrax analysis using R.A.P.I.D. PCR detection system.
- Large-scale soil remediation project at a US EPA Superfund site. Analyses of air, soil and water samples for volatile organic compounds.
- Rapid response site assessment for volatile organic compounds following a major train derailment.
- Soil PCB analyses during both site investigation and remediation using a project-specific analytical procedure.
