

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

RIN 3150-AH87

List of Approved Spent Fuel Storage Casks: VSC-24 Revision 6

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend its regulations revising the BNG Fuel Solutions Corporation VSC-24 cask system listing within the “List of Approved Spent Fuel Storage Casks” to include Amendment No. 6 to the Certificate of Compliance. Amendment No. 6 would modify the present cask system design to revise the Technical Specification (TS) requirements related to periodic monitoring during storage operation. Specifically, the amendment would eliminate TS 1.3.4 that requires daily temperature measurement of the cask. The daily temperature measurement is not required because the daily visual inspection of the cask inlet and outlet vent screens, required by TS 1.3.1, provides the capability to determine when corrective action needs to be taken to maintain safe storage conditions under the requirements that govern general design criteria for spent fuel storage casks. This is because the visual inspection would determine if the cask inlets and outlets were blocked (the focus of the thermal analysis submitted by the CoC holder). The amendment would also revise TS 1.2.3 to correspond with TS 1.3.1 by revising the method of thermal performance evaluation to allow for daily temperature surveillance after the cask has reached thermal equilibrium. In addition, the amendment would update editorial

changes associated with the company name change from BNFL Fuel Solutions Corporation to BNG Fuel Solutions Corporation.

DATES: Comments on the proposed rule must be received on or before **(insert date 30 days after publication in the Federal Register)**.

ADDRESSES: You may submit comments by any one of the following methods. Please include the following number (RIN 3150-AH87) in the subject line of your comments. Comments on rulemakings submitted in writing or in electronic form will be made available for public inspection. Because your comment will not be edited to remove any identifying or contact information, the NRC cautions you against including personal information such as social security numbers and birth dates in your submission.

Mail comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, ATTN: Rulemakings and Adjudications Staff.

E-mail comments to: SECY@nrc.gov. If you do not receive a reply e-mail confirming that we have received your comments, contact us directly at (301) 415-1966. You may also submit comments via the NRC's rulemaking website at <http://ruleforum.llnl.gov>. Address questions about our rulemaking website to Carol Gallagher (301) 415-5905; e-mail cag@nrc.gov. SUPPLEMENTARY INFORMATION:

For additional information see the direct final rule published in the final rules section of this Federal Register.

Procedural Background

This rule is limited to the changes contained in Amendment No. 6 to CoC No. 1007 and does not include other aspects of the VSC-24 cask system design. The NRC is using the “direct final rule procedure” to issue this amendment because it represents a limited and routine change to an existing CoC that is expected to be noncontroversial. Adequate protection of public health and safety continues to be ensured. The direct final rule will become effective on **(insert date 75 days after publication in the Federal Register)**. However, if the NRC receives significant adverse comments by **(insert 30 days after publication in the Federal Register)**, then the NRC will publish a document that withdraws the direct final rule and will subsequently address the comments received in a final rule. The NRC will not initiate a second comment period on this action.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule’s underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, in a substantive response:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or

considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC staff to make a change (other than editorial) to the CoC or TS.
