NRC Request:

All addressees are requested to provide a response to this GL that contains either the information requested in Option 1 or Option 2:

Option 1:

Within 30 days of the date of this GL, either confirm that you have submitted a request to modify the SG portion of your TS that is consistent with TSTF-449, Revision 4, or provide a regulatory commitment detailing your plans and schedule for submitting such a request (refer to Regulatory Issue Summary 2000-17, "Managing Regulatory Commitments Made by Power Reactor Licensees to the NRC Staff"). If you modify your commitment so that the request will not be submitted by May 31, 2006, provide the information requested in Option 2 within 60 days of changing your commitment.

If your commitment is to submit a request after May 31, 2006, provide the information requested in Option 2. If you or the NRC staff determine that your submittal is not consistent with TSTF-449, Revision 4, provide the information requested in Option 2 within 60 days of this determination.

Option 2:

Within 60 days of the date of this GL, provide a description of the actions being taken or that will be taken to ensure tube integrity is being maintained (i.e., provide a detailed description of your tube integrity program).

HNP Response:

Per Option 1 of GL 2006-01, HNP commits to submit a request to modify the Steam Generator portion of the Technical Specifications (TS) that will be consistent with TSTF-449, Revision 4 by May 31, 2006. The HNP TS are in the standard format of NUREG-0452 rather than the improved format of NUREG-1431 as provided in TSTF-449, Revision 4. Therefore, the format submitted by HNP may be different, but the content will be consistent with TSTF-449, Revision 4.
