Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
30-Day Response to NRC Generic Letter 2006-01, "Steam Generator Tube Integrity
and Associated Technical Specifications"

Dear Commissioners and Staff:

NRC Generic Letter (GL) 2006-01, "Steam Generator Tube Integrity and Associated Technical Specifications," dated January 20, 2006, was issued to request pressurized water reactor addressees to either submit a description of their program for ensuring steam generator (SG) tube integrity for the interval between inspections or adopt alternative technical specification (TS) requirements for ensuring SG tube integrity, consistent with Technical Specification Task Force (TSTF) Standard Technical Specification Change Traveler TSTF-449, Revision 4.

GL 2006-01 requested that all addressees provide a response that contains either the information requested in Option 1 or Option 2:

Option 1: Within 30 days of the date of this GL, either confirm that you have submitted a request to modify the SG portion of your TS that is consistent with TSTF-449, Revision 4, or provide a regulatory commitment detailing your plans and schedule for submitting such a request (refer to Regulatory Issue Summary 2000-17, "Managing Regulatory Commitments Made by Power Reactor Licensees to the NRC Staff"). If you modify your commitment so that the request will not be submitted by May 31, 2006, provide the information requested in Option 2 within 60 days of changing your commitment.

If your commitment is to submit a request after May 31, 2006, provide the information requested in Option 2. If you or the NRC staff determine that your submittal is not consistent with TSTF-449, Revision 4, provide the information requested in Option 2 within 60 days of this determination.

Option 2: Within 60 days of the date of this GL, provide a description of the actions being taken or that will be taken to ensure tube integrity is being maintained (i.e., provide a detailed description of your tube integrity program).

Pacific Gas and Electric Company (PG&E) will be submitting a request prior to May 31, 2006, to modify the SG portion of the TS for Diablo Canyon Power Plant Units 1 and 2, consistent with TSTF-449, Revision 4. This constitutes a regulatory commitment. In accordance with the provisions of Section 182a of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f), PG&E is submitting this letter under oath and affirmation.

If you have questions regarding this response, please contact Mr. Stan Ketelsen at (805) 545-4720.

Sincerely,

Donna Jacobs
Vice President – Nuclear Services
