SUBJECT: Nine Mile Point Nuclear Station
Unit No. 1; Docket No. 50-220

Special Report: Channel #11 of the Containment Hydrogen Monitoring
System Inoperable for Planned Preventive Maintenance

In accordance with Action 4.a of Nine Mile Point Unit 1 Technical Specification Table 3.6.11-2, "Accident Monitoring Instrumentation Action Statements," Nine Mile Point Nuclear Station, LLC, is submitting the following Special Report concerning inoperability of Channel #11 of the Containment Hydrogen Monitoring (CHM) System.

Description of Event

On February 13, 2006, at 0844 hours, operators declared Channel #11 of the CHM System inoperable to perform planned preventive maintenance.

Cause of Inoperability

Channel #11 of the CHM System was removed from service to support planned preventive maintenance. Maintenance activities included component replacements required on one, two and ten year frequencies.

Channel #12 of the CHM System was verified to be operable prior to removing Channel #11 from service.

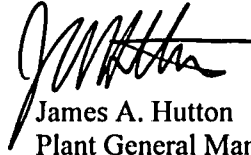

Actions Taken

Maintenance was completed, surveillance testing was performed satisfactorily and Channel #11 of the CHM System was restored to operable status on February 17, 2006, at 1400 hours.

Should you have any questions regarding this submittal, please contact M. H. Miller, Licensing Director, at (315) 349-1510.
