Mr. Boner:

The March 15 meeting (note that it is not a hearing) is being held at ExxonMobil's request. It's purpose is to allow ExxonMobil to update NRC staff on the status of the Highlands site and to discuss issues it believes needs to be resolved prior to license termination. Requests for revision to the surety bond or termination of the license must be made in writing by licensees. We have not received a request from ExxonMobil to terminate its license or bond.

If you have any questions you can email me at mhf1@nrc.gov or call me at 301-415-6629.

Myron Fliegel, project manager

Mr. Fliegel, I represent our family which are ranchers bordering Exxon's Highlandmine site. I am forwarding an e-mail that I sent to Lou Miller earlier today. I just talked to Lou and he assured me that Exxon was not requesting a termination of their license and bond at the March 15, 2006 hearing, rather the hearing was just to update NRC on the status of the site. As the earlier e-mail to Lou Miller states, due to a potential plume located on our property Boner Bros. opposes the termination of the Exxon license at this time. Sincerely, Rob Boner Boner Bros. Partnership

Lou, Attached is the notice of a hearing Exxon has scheduled for March 15 to get their bond released from NRC. Boner Bros. would stand in strong opposition to Exxon being released from their bond until the status on the potential plume has been determined. I will call you momentarily. Sincerely, Rob Boner Boner Bros. Partnership
