Mr. Polonczyk, I haven't given you a room number yet because I have yet to secure a room through the resident staff. I will email you the room number as soon as I get it. I look forward to seeing you at 1:30 on Tuesday. Jeff Teator

I do not see any reason why I can not meet with you, of course this is an industry where the workload can change without notice. I will forward this to the applicable management personnel and plan on the meeting unless they say otherwise. You have mentioned a 01:30 meeting and a 01:15 meeting, close enough that it really doesn't matter, BUT.... you never mentioned where the meeting would be other than at TB2.

ALPO.....

Mr. Polonczyk, I will be at the site on Tuesday. I have some appointments scheduled already. Can I meet with you at 1:15 pm on Tuesday, 8/10/04. Please confirm by return email or call me at (610) 337-5184. Jeff Teator

I usually report to work earlier than most, around 18:00 hours. If you need to meet during work hours that is OK with me. I leave around 06:30 in the morning, but prefer to not interfere with end of shift turnover times, or remain at work after the assigned 12 hours. I do not mind however coming in on my days off, even for relatively short periods. I live close enough to not make too much of an inconvenience out of such visits. You will need to set up such a meeting through Operations management as stated before.

ALPO.....

Mr. Polonczyk, What time will you be coming to work on next Wednesday night and what time do you finish in the morning - maybe we can meet during your work hours or before or after work. That is one option. Another option is to meet on one of your days off next week. I probably only need about an hour of your time and I can come to your residence or I can meet you somewhere near your residence. ~~Neither~~ two options do not work for you -

Information in this record was deleted

K-11

then I will meet with you on 8/10 or 8/11 during your day shift. Without getting in to too many specifics - I will interview you regarding your knowledge of why/how [REDACTED] closed the valve, thus stopping the steam leak. Please let me know of your availability.

I am currently working the night shift, rotating with "Bravo" shift. I am scheduled this week through Monday morning. I will return Wed night for Thursday, and the next three nights as well (leaving Sunday morning). The following two weeks, Aug 10th through 13th and Aug 16th through 19th I should be on Day work. I do not have a phone extension where I can be contacted, but if you need to have time with me I am sure it can be arranged through Ops Supervision (try Eric Powell or Joe Sullivan).

If I may ask, what specifically do you want to know. I might better prepare myself if I had some clue to the information you are seeking.

Mr. Polonczyk, I attempted to contact you through the dial in/name spelling method and was unsuccessful. Anyway, I work for NRC/OI in the Region I Field Office and need to speak to you about the [REDACTED] steam valve issue. I plan on being at the plant sometime next week and would like to discuss with you a time and location where we could meet. Please call me at my office at 610-337-5184, or respond via email. Thanks, Jeff Teator
