PROGRAM SCOPE

The licensee is ^a manufacturing and distribution firm located in Appleton, WI. They distribute watches which contain tritium on the face and dials. These devices are primarily intended for use by members of law enforcement or military working in low light situations. Licensee has a total of six individuals qualified to work with the materials.

Performance Observations

The inspector viewed the licensee's use of material including storage and accountability. The license of ASP requires that they maintain inventory below 1000 units and less than 25 curies of tritium. Licensee has a program in place to alert them if inventory exceeds five hundred units. Interviews of licensee personnel indicated an adequate level of knowledge of radiation safety.

Licensee has only distributed for less than one year, so no records have been forwarded to NRC. Licensee was reminded of the requirement for timely filing.

No violations of requirements were noted.
