LISLE, ILLINOIS 60532-4352

FEB 16 2006

Frank Thomas John
Radiation Safety Officer
Indiana Department of Transportation
18 S. Broadway
Greenfield, IN 46140

Dear Mr. John:

Enclosed is Amendment No. 05 to your NRC Material License No. 13-26341-01, in accordance with your request. Please note that the changes made to your license are printed in **bold font**. Also, as was discussed with you during our telephone conversation on February 6, 2006, **please note our office has moved and that our current mailing address is 2443 Warrenville Road, Suite 210, Lisle, Illinois 60532-4352, as shown above on this letter head**. Please use this address for all future written correspondence with us.

Please note that License Condition 14, which addresses security criteria for portable nuclear gauges, has been modified in its entirety to incorporate additional security measures. These security measures are based on revisions to 10 CFR Part 30, by the addition of paragraph 30.34(l), "Security requirements for portable gauges," as published in the Federal Register on January 12, 2005, with an effective date of July 11, 2005. The final rule requires a portable gauge licensee to use a minimum to two independent physical controls that form tangible barriers to secure portable gauges from unauthorized removal whenever the portable gauges are not under the control and constant surveillance of the licensee. You should have previously received a copy of this regulatory requirement by mail. This mailing included a revised copy of Appendix H, "Operating, Emergency, and Security Procedures," of NUREG 1556 Volume 1, Revision 1, Consolidated Guidance About Materials Licenses; Program-Specific Guidance About Portable Gauge Licenses, dated November 2001, which incorporates these changes.

Please review the enclosed document carefully. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedures for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

This letter and the enclosed license document are exempt from public disclosure in accordance with 10 CFR 2.390, because their disclosure to unauthorized individuals could present a security vulnerability.

Sincerely,

A handwritten signature in black ink, appearing to read "Loren J. Hueter". The signature is fluid and cursive, with the first name "Loren" being more prominent.

Loren J. Hueter
