

WEEKLY REPORT TO THE COMMISSION

OFFICE OF NUCLEAR MATERIAL SAFETY AND SAFEGUARDS

Proposed Rule Signed by EDO

On _____, 2006, the Executive Director for Operations approved a proposed rule which revises 10 CFR Part 72.214, "List of approved spent fuel storage casks," revising the BNG Fuel Solutions Corporation (FuelSolutions™) cask system listing within the "List of approved spent fuel storage casks." This amendment would revise the Technical Specification (TS) requirements related to periodic monitoring during storage operation. Specifically, the amendment would revise the TS to permit longer surveillance intervals for casks with heat loads lower than the design basis heat load and permit visual inspection of the cask vent screens or measurement of the cask liner temperature to satisfy the periodic monitoring requirements of 10 CFR 72.122(h)(4). TS 3.3.1 would be deleted to remove daily monitoring requirements. TS 3.3.2 would be revised for the W21 and W74 canisters to permit either visual inspection of vent screens or liner thermocouple temperature monitoring. Also, TS 5.3.8 would add a section to the Periodic Monitoring Program which establishes intervals for periodic monitoring that are less than the time required to reach the limiting short-term temperature limit. This program would establish administrative controls and procedures to assure that the licensee will be able to determine when corrective action is required. In addition, the amendment would update editorial changes associated with the company name change from BNFL Fuel Solutions Corporation to BNG Fuel Solutions Corporation and make other administrative changes.
