Hi Mike, I know you must have been busy at work and with the holidays that have passed. I don't know if it was your work or that you had forgotten my request for information on Oyster Creek, (safety records, operation enhancements, general info, etc). We have our meetings on the first Tuesday of the month so I would like to be able to present any information you can provide to our members. I thank you for all help you can providr concerning this matter.

Sincerely Jim Fitzgerald

Mike. We spoke briefly at the Nov.1 meeting on Oyster Creek power plant. I was unable to stay for the entire session however we spoke in the hallway and you were able to give me answers to my questions concerning the safety and operating procedures about the power plant from a NRC perspective. I am a member of a small group called Ocean County Democrats and would like to request any material you have concerning the operations and safety of Oyster Creek power plant so I can provide information to our members about it. Many of our members have concerns on Oyster Creek and it's ability to safely generate power for another 20 years or so. They also have concerns about evacuation routes from the area if anything should happen at the power plant. Evacuation routes are probably not in your arena, however we would appreciate any information you may be able to share about them.

I thank you for any information you can provide concerning this matter.

Sincerely;

Jim Fitzgerald
