Correction March 14 he declared a drought.
Pb

On Tuesday March 15, 2006 Governor Richardson declared a drought in the State of New Mexico and urged everyone from Government to citizens to conserve water.

Since the Governor and the NM State government has declared a drought, Its my allegation, that the NRC studies (and any state of New Mexico studies) on the impact of the Louisiana Energy Services uranium enrichment plant on the water supply in Lea county are in error.

Its my contention to the NRC and the State of New Mexico that the LES plant would put an excessive drain on the existing water supply, which is already in decline. This would also put the water supply for people in this area and Lea County Farmers and ranchers at risk.

Phillip Barr
Lea county, new mexico
