Subject: Eunice and the Les enrichment plant and weather conditions with source noted

<http://weather.msn.com/local.aspx?wealocations=wc:USNM0107><<http://weather.msn.com/local.aspx?wealocations=wc:USNM0107>> Weather link.

What would it be like if the LES enrichment plant were in operation today?
Check out the winds speeds listed. (under map) 25-35 miles per hour to the west.
That would put the emissions (u234,235,236,238) into the winds and dust over Eunice in approx. 8 minutes. or less.
If the winds stayed constant, that would place emissions over people all day.
Doesn't this sound unhealthy?
People in Tenn. didn't want their children breathing this crap.
Do we?
Think about it.

Phillip
