MAR 21 2006

Robert M. Zerr
Radiation Safety Officer
Director, Risk Management & Safety
University of Notre Dame
636 Grace Hall
Notre Dame, IN 46556

Dear Mr. Zerr:

Enclosed is Amendment No. 41 to your NRC Material License No. 13-01983-15 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

This also refers to the telephone discussions between Andrew Welding of your staff and me on March 20, 2006, and March 21, 2006, concerning the chemical/physical form of the californium-252 source listed in Subitem No. 6.J. of your license. In a voicemail sent to me by Mr. Welding on March 22, 2006, it was confirmed that the chemical/physical form for this source would not change and would remain a "sealed source," in accordance with the definition of "sealed source" in 10 CFR 30.4. This amendment has been prepared in accordance with this information.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. The enclosed license document is exempt from public disclosure in accordance with 10 CFR 2.390, because its disclosure to unauthorized individuals could present a security vulnerability.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. The enclosed license document is exempt from public disclosure in accordance with 10 CFR 2.390, because its disclosure to unauthorized individuals could present a security vulnerability.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".
